## Bioscience, Inc. Partners with Xperential Scientific to Distribute its Analytical Products in Australia and New Zealand.

Bioscience, Inc. has been a trusted partner in the field of waste and wastewater treatment and monitoring worldwide for nearly 30 years.

Founded in 1984, the Pennsylvania firm specializes in the application of custom microbial cultures for the biological processing of waste, as well as the manufacture of specialized instruments and test kits for wastewater analysis.

Harry Traikos, Director of Xperential Scientific is excited to have partnered with Bioscience, Inc. and offer customers world-class analytical products at the most accurate, intuitive methods of obtaining the key measurements related to wastewater characterization in Australia and New Zealand.

Bioscience, Inc. Accu-TEST® Chemical Oxygen Demand (COD) Testing Products, BI-2000® Laboratory Respirometer and AMPULMATIC® Bench-Scale Ampule Sealer offer wastewater plants, research facilities and associated laboratories:

Ease of use

Long-term accuracy

Durability

Measurable ROI

Experienced and responsive technical support

Guaranteed satisfaction
