## Xperential Scientific starts HSC Chemistry Software Distribution in Australia and New Zealand.

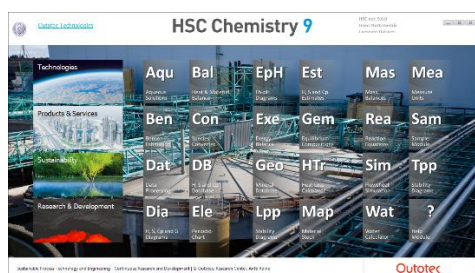

**Outotec** based in Finland is the global leader in minerals and metals processing technology, Outotec has developed many breakthrough technologies over the decades. The company also provides innovative solutions for industrial water treatment, the utilization of alternative energy sources and the chemical industry.

**Outotec's** Chemical Reaction and Equilibrium Software HSC Chemistry is the world's favourite thermochemical software with a versatile flowsheet simulation module. HSC is designed for various kinds of chemical reactions and equilibria calculations as well as process simulation.

**Harry Traikos**, Director of **Xperential Scientific** is excited to represent and support the HSC – Chemistry software and increase its product offering to customers in Australia and New Zealand.

### About the software

The name of the program is based on the fact that calculation modules automatically utilize the same extensive thermochemical database which contains enthalpy (H), entropy (S) and heat capacity (Cp) data for more than 28 000 chemical species. This database is equivalent to more than twenty thick data books.

The current HSC version 9.0 contains 24 calculation modules: Please contact Xperential Scientific for more information.

Regards

**Dr. Antti Roine**  
Technical Director – Modeling and Simulation  
Outotec
