Sepax-Technologies, Inc. Partners with Xperiential Scientific for Distribution in Australia and New Zealand.

Sepax-Technologies, Inc. Headquartered in Delaware, USA, Sepax-Technologies, Inc. is a privately held company founded in November 2002. Sepax focuses on customers' needs and provides solutions to customers challenges in chromatographic separation science. Sepax develops and manufactures HPLC consumables, bulk media, and equipment for chemical and biological separations in liquid chromatography. Sepax is a fast growing technology company and has emerged as a leader in the biological separation industry. Sepax has been developing a wide range of intellectual properties in the areas of particle synthesis, surface modification, LC column packing, bulk media production, and purification process development. Sepax Quality Management System is ISO 9001:2008 certified.

Sepax-Technologies, Inc. focuses on three business areas: 1) bioanalytical solutions, 2) solution based process purification and 3) medical diagnostics.

In the bioanalytical area, they provide comprehensive LC column products and services to meet the needs of each market fragment of the biomolecules separation and analysis.

For process chromatography, they provide solutions to customers' needs for various scales of the purification, including process development, bulk media and equipment.

Their innovative technologies deliver unique products for medical diagnostics, such as GlyHb, a high resolution product for diagnosis of diabetes.

Xperiential Scientific (www.xperientialscientific.com.au) is a new established scientific instrumentation, consumable, software and diagnostic supplier based in Melbourne, Australia.

"Sepax-Technologies, Inc. are very pleased with the enthusiasm and knowledge of the Xperiential Scientific team and are confident that this partnership will result in excellent sales and service support for our customers in the region as well solid business growth" said **Ting Wu**, from Sepax-Technologies, Inc. International Sales Manager.

Harry Traikos, Director of *Xperiential Scientific* commented that "*Sepax-Technologies, Inc* is a well-respected brand and an innovative company which will bring a new era in Chromatography. We are very excited to have formed this partnership with such an innovative company and looking forward in supporting customers with Sepax-Technologies, Inc in Australia and New Zealand.
